

# Platform "DMEX "

## *Experimental X Ray Methodology Development*

The DMEX platform, certified ISO 9001, offers X-ray imaging and characterization services of solid materials.

## Fields of application

- Geosciences
- Materials
- Environment

## Themes and skills

- Non-destructive morphological characterization,
- Visualization of the internal structure of natural, biological and artificial materials with details of the order of a thousandth of a millimetre
- Use of samples under pressure and temperature constraints

## Equipment and Instruments

- X-ray tomography,
- Morphological analysis tomography
- Sample preparation (core drill)
- Image processing

## Quality approach

ISO 9001 Certification
